

Call for Sponsors: IWOMP 2020

September 21-24, 2020 | Texas Advanced Computing Center (TACC)

GET INVOLVED! Help Shape the OpenMP Community!

The International Workshop on OpenMP (IWOMP) is the premier conferences that spotlight new and original work in the community of OpenMP users and developers.

The 1-day Tutorial and 3-day IWOMP workshop presentations will be presented entirely virtually over Zoom. OpenMP users, program developers and implementers often attend multiple events to network, exchange experiences, learn about new features and the direction of OpenMP, the *de facto* standard for threaded parallel programming which also supports portable directives for vector execution and offloading to devices.

The presentations at IWOMP (accepted as proceedings in the Springer LNCS series) attract a diverse group of attendees that use a wide variety of platforms and toolsets. Your sponsorship will promote your organization, and will also help keep OpenMP accessible to the widest possible audience.

Conferences at a Glance

Tutorial Day and IWOMP

DATES

Sept. 21/22-24 Tutorial/IWOMP

LOCATION

@TACC, Univ. of Texas, Austin TX

ACTIVITIES

Presentations, Keynotes, Papers, and 1-day of Tutorials
